Career Objective

I have worked desktop and artificial intelligence projects with the python language. I have had the opportunity to contribute as an organizer with the Pyladies Cochabamba community and Pycon Bolivia. I have been instructor of Cisco Networking Academy. I am looking to work with international companies where I can have the opportunity to contribute to research projects. I focus on new challenges to keep me growing.
I stand out for being resilient, planning, commited, and pay attention to details and my desire overcoming.
